

acyl-CoA metabolic process

features = 13 , max = 2

blood microparticle

features = 17 , max = 2

catalytic activity

features = 480 , max = 4

cellular amino acid metabolic process

features = 24 , max = 1

cellular lipid metabolic process

features = 10 , max = 1

cellular response to estrogen stimulus

features = 25 , max = 4

cholesterol binding

features = 17 , max = 2

cholesterol biosynthetic process

features = 12 , max = 2

cholesterol efflux

features = 13 , max = 2

cholesterol homeostasis

features = 11 , max = 2

cholesterol metabolic process

features = 21 , max = 2

cholesterol transporter activity

features = 17 , max = 2

chylomicron

circadian regulation of gene expression

endopeptidase inhibitor activity

fatty acid metabolic process
